

**UNION OF INTERNATIONAL ASSOCIATIONS**  
UNION DES ASSOCIATIONS INTERNATIONALES

Press Release 28th June 2016, By Joel Fischer

**Union of International Associations (UIA)  
International Meetings Statistics Report  
57<sup>th</sup> edition, published June 2016**

**Introduction**

For the past six decades, the Union of International Associations (UIA) has undertaken statistical studies on the preceding years' international meetings. The complete report is available for sale to the public following a period of three months' exclusive use by UIA Associate Members; it will be available to non-members from September 1st 2015.

The statistics are based on information systematically collected by the UIA Congress Department and selected according to strict criteria maintained over the years, thus enabling meaningful comparison from year to year.

Meetings taken into consideration include those organized and/or sponsored by the **international organizations** which appear in the *Yearbook of International Organizations* and in the *International Congress Calendar*, i.e. the sittings of their principal organs, congresses, conventions, symposia, regional sessions grouping several countries, as well as **some national meetings with international participation** organized by national branches of international associations.

Not included are purely national meetings as well as those of an exclusively religious, didactic, political, commercial, or sporting nature, and corporate and incentive meetings, the survey of these specific markets not being within the scope of activities of the UIA.

More prominence is also given to presenting data which, due to the passage of time, can be considered to have stabilized. **The editors emphasize that the number of meetings in the database for the current reporting year will, on average, increase by 11 percent over the next year, and by nearly 35 percent over the following five years.**

As of the report for 2008 (published in 2009), the UIA meetings database has been enriched by connecting it more closely to its sister database on international organizations, the source of the *Yearbook of International Organizations*. This enriches the data available across the time scale and in particular enables historical surveys of international organization meeting activity as far back as the 1850s.

**It should be noted that UIA criteria for collection and inclusion have *not* changed over time; only the presentation has changed.**

## How many...

	<b>57<sup>th</sup> edition</b> (published 2016)	56 <sup>th</sup> edition (published 2015)
Total number of meetings in the UIA database	458,453	428,369
Number of those answering the criteria for inclusion in this report	412,403	384,097
Number of those taking place prior to the reporting year	393,667	364,834
Number of those taking place in the reporting year	12,350	12,212
Number of those scheduled to take place after the reporting year	6,386	7,051
Number of countries represented for all years	248	252
Number of cities represented for all years	12,683	11,959
Number of countries represented for the reporting year only	178	181
Number of cities represented for the reporting year only	1,449	1,493

## General picture

### Top international meeting countries in 2015 (extracted from Table 1.2, A+B column)

Country	Number of meetings	Percentage of all meetings
1. USA	930	7.8%
2. Korea Rep	891	7.5%
3. Belgium	737	6.2%
4. Singapore	736	6.2%
5. Japan	634	5.3%
6. France	590	5.0%
7. Spain	480	4.0%
8. Germany	472	4.0%
9. Italy	385	3.2%
10. Austria	383	3.2%

### Top international meeting cities in 2015 (extracted from Table 1.3, A+B column)

City	Number of meetings	Percentage of all meetings
1. Singapore	736	6.3%
2. Brussels	665	5.7%
3. Seoul	494	4.2%
4. Paris	362	3.1%
5. Vienna	308	2.1%
6. Tokyo	249	2.1%
7. Bangkok	242	1.8%
8. Berlin	215	1.6%
9. Barcelona	187	1.4%
10. Geneva	172	1.4%

The Table of Contents of the complete statistics report and the criteria descriptions are given on the following pages.

Associated and complementary information is available in the *Yearbook of International Organizations: Volume 5 (Statistics, Visualizations and Patterns)* which contains extensive statistical information on international meetings and organizations (see <http://www.uia.org/yearbook>).

For more information on UIA Associate Membership, statistical and other information products, please contact us (<http://www.uia.org/contact-uia>).

Reproduction, whether partial or otherwise, is authorized provided clear mention of author and source is given.

### Section 1: Statistics for the current reporting year, 2015

*Data on international association meetings held in the current reporting year, 2015.*

*Includes the three types of meetings – Type A, Type B, and Type C – as described in the Introduction under the heading “What meetings are counted in this report”.*

<b>Table 1.1.</b>	<b>International association meetings by country and city in 2015</b>	<b>13</b>
	Details by city and country of meetings of type A, type A+B, and type A+C	
<b>Table 1.2.</b>	<b>Top countries for international association meetings in 2015</b>	<b>48</b>
	(a) Countries with the most meetings of type A	
	(b) Countries with the most meetings of type A+B	
	(c) Countries with the most meetings of type A+C	
<b>Table 1.3.</b>	<b>Top cities for international association meetings in 2015</b>	<b>51</b>
	(a) Cities with the most meetings of type A	
	(b) Cities with the most meetings of type A+B	
	(c) Cities with the most meetings of type A+C	
<b>Table 1.4.</b>	<b>Top countries for international association meetings in 2015 by continental grouping</b>	<b>54</b>
	(a) Countries with the most meetings of type A	
	(b) Countries with the most meetings of type A+B	
	(c) Countries with the most meetings of type A+C	
<b>Table 1.5.</b>	<b>Top cities for international association meetings in 2015 by continental grouping</b>	<b>58</b>
	(a) Cities with the most meetings of type A	
	(b) Cities with the most meetings of type A+B	
	(c) Cities with the most meetings of type A+C	

## Section 2: Statistics for the current reporting year, 2015: supplementary information

**NEW!**

*Data on international association meetings held in the current reporting year, 2015, compared to international association membership and secretariats (as documented in the database of the Yearbook of International Organizations) and to population.*

*Includes only meetings of Type A, as described in the Introduction under the heading “What meetings are counted in this report”.*

*With thanks to Anne Wallin Rodven!*

<b>Table 2.1.</b>	<b>Ratio of association membership to meetings in 2015</b>	<b>61</b>
	(a) Ratio of the number of international association meetings to the number of international associations with meetings in the country	
	(b) Top countries by association membership:meeting ratio	
<b>Table 2.2.</b>	<b>Ratio of association secretariats to meetings in 2015</b>	<b>64</b>
	(a) Ratio of the number of international association secretariats to the number of international associations with meetings in the country	
	(b) Top countries by association secretariats:meeting ratio	
<b>Table 2.3.</b>	<b>Ratio of population to meetings in 2015</b>	<b>68</b>
	(a) Ratio of the number of international association meetings to the population of the country	
	(b) Top countries by population:meeting ratio	

## Section 3: Fifteen year review, 2001-2015

*Data on international association meetings held in the past fifteen years, from 2001 to 2015. Only those countries and cities with the most meetings in the years specified are included.*

*Includes only meetings of Type A, as described in the Introduction under the heading “What meetings are counted in this report”.*

<b>Table 3.1.</b>	<b>Top countries for international association meetings in 2001-2015</b>	<b>72</b>
	Countries with at least 20 meetings of type A during the period 2001-2015	
<b>Table 3.2.</b>	<b>Top cities for international association meetings in 2001-2015</b>	<b>75</b>
	Cities with at least 100 meetings of type A during the period 2001-2015	
<b>Table 3.3.</b>	<b>Top countries for international association meetings in 2001-2015: ranking</b>	<b>80</b>

## What meetings are counted in this report?

### General remarks

The data in this report are drawn from the *International Congress Calendar*, the meetings database of the Union of International Associations (UIA), and from the *Yearbook of International Organizations*, the associations database of the UIA.

The criteria for inclusion in the *International Congress Calendar* are broad, reflecting the UIA's focus on the broad spectrum of international associations. (See also below, "What is an international organization".)

- The meeting must have a clear link to an international association as defined by the *Yearbook of International Organizations*, the associations database of the UIA (see below "What is an 'international organization'"). An exception is made for meetings of Types "B" and "C" used in Section 1, as described below.
- Meetings of both international non-governmental organizations (INGOs) and intergovernmental organizations (IGOs) are eligible for inclusion in the *International Congress Calendar*.
- Meetings are eligible for inclusion in the *International Congress Calendar* regardless of their frequency. A meeting can be a one-off event, part of a regular series, or part of an irregular series.
- Meetings are eligible for inclusion in the *International Congress Calendar* regardless of their location. A meeting series can be held always in the same location, or rotate according to a pattern between locations, or change locations randomly.
- Meetings are eligible for inclusion in the *International Congress Calendar* regardless of their participant numbers. However, in order to be counted in this report, a meeting must have at least 50 participants, or the number of participants must be unknown.

Some events take place in more than one city; such events are counted in this report for each city separately.

At the time of producing this edition (May 2016) there were 458,453 meetings in the UIA meetings database of which 412,403 (90%) meet the criteria for inclusion in this report. Of these 412,403 meetings, 393,667 took place in 2014 or earlier, 12,350 took place in 2015, and 6,386 are scheduled for 2016 or later.

### Types of meetings

Meetings included in this report are divided into three types. The types are indicated by letters: type A, type B and type C. These letters have, in themselves, no significance in relation to the meetings they group, and are used merely for convenience.

#### **Meetings counted under the heading "A" are "Meetings of international organizations" and meet all the following criteria:**

- meetings organized or sponsored by "international organizations", i.e. international non-governmental organizations (INGOs) and intergovernmental organizations (IGOs) that are included in the UIA's *Yearbook of International Organizations* (see below "What is an 'international organization'") and whose details are subject to systematic collection and updates on an annual basis by the UIA
- with at least 50 participants, or number of participants unknown

In previous editions, this type was referred to as "Meetings of international organizations". The criteria for this type have not changed at any point since the first edition of this report in 1960, although they were not always fully described in the accompanying notes.

There are 380,067 type "A" meetings included in this edition for all years; there are 10,823 type "A" meetings included in this edition for 2015 alone. Type "A" meetings are included in all sections of this report.

**Meetings counted under the heading “B” are “Other international meetings (3 days)” and meet all the following criteria:**

- meetings not organized or sponsored by “international organizations” but nonetheless of significant international character, notably those organized by national organizations and national branches of international organizations
- at least 40 percent of the participants are from countries other than the host country and at least 5 nationalities are represented
- lasting at least 3 days, or of unknown duration
- with either a concurrent exhibition or at least 300 participants

In previous editions, this type was referred to as “Other international meetings”. In the edition *International Meetings Statistics for the year 2007* (49<sup>th</sup> edition, published in 2008), it was further defined as “Other international meetings (3 days)”. The criteria for this type have not changed since at least the early 1990s, although they were not always fully described in the accompanying notes.

There are 24,994 type “B” meetings included in this edition for all years; there are 1,021 type “B” meetings included in this edition for 2015 alone. Type “B” meetings are included in only Section 1 of this report.

**Meetings counted under the heading “C” are “Other international meetings (2 days)” and meet all the following criteria:**

- meetings not organized or sponsored by “international organizations” but nonetheless of significant international character, notably those organized by national organizations and national branches of international organizations
- at least 40 percent of the participants are from countries other than the host country and at least 5 nationalities are represented
- lasting at least 2 days, or of unknown duration
- with either a concurrent exhibition or at least 250 participants

This type was included for the first time, at the request of users of this report, in the edition *International Meetings Statistics for the year 2007* (49<sup>th</sup> edition, published in 2008), where it was referred to as “Other international meetings (2 days)” and included only in presentation 1/2. Type “B” and type “C” are counted separately in order to ensure continuity with prior editions and the creation of type “C”.

There are 32,318 type “C” meetings included in this edition for all years; there are 1,527 type “C” meetings included in this edition for 2015 alone. Type “C” meetings are included in only Section 1 of this report.

Logically, all meetings counted under the heading “B” are also counted under the heading “C”. The reverse is, equally logically, not true.

## **Methods of selection**

Regarding participant numbers, all selections have been made on the basis of “at least” 50 participants in the case of meetings of international organizations, and “at least” 250 or 300 participants for other international meetings. In editions prior to *International Meetings Statistics for the year 2007* (49<sup>th</sup> edition, published in 2008) it has not always been clear if selections were made on the basis of “at least” 50 (or 250 or 300) participants, or “more than” 50 (or 250 or 300) participants.

In editions prior to *International Meetings Statistics for the year 2007* (49<sup>th</sup> edition, published in 2008) it was the intention to exclude meetings of intergovernmental bodies if the title of the meeting contained the words “ministerial” or “summit”. Unfortunately, this criterion was not always strictly applied: some such meetings were excluded, others were included. As of the edition published in 2008 (49<sup>th</sup> edition), this criterion has been abandoned. Meetings of intergovernmental bodies are included if they meet the standard criteria. The number of meetings concerned is in most cases not significant enough to affect percentages or rankings.
