Global Growth Workshop

Monday, 12 November 2012 Brussels, Belgium
THE BIG PICTURE

WHAT DOES IT MEAN TO “GO INTERNATIONAL”?
Your workshop Facilitator

Terrance Barkan CAE is a global thought leader on international association management. He is the author of numerous articles and white papers on global growth strategies that have been used by hundreds of organizations.

He has been published by the American Society of Association Executives, the European Society of Association Executives and is a former Chair of the ASAE International Section Council.

His international business experience has taken him to more than 60 countries around the world, working with over 200 international associations on development projects over more than 20 years.

How to define and Measure “Success”

• One of the most difficult parts of international strategy, especially for the Board

• Combination of “Hard” (easily measured) and “Soft” (vague or subjective) objectives

• Defining “success” is the most critical and is one of the very first steps to defining your strategy.
What does “success” look like?

Altruistic

• Outreach & Impact
• Support & Collaboration
• Resource Consuming
• Difficult to measure

ROI

• Members & Products
• Services
• Resource Generating
• Easy to measure
Association Survey Results*

*268 responses

- Professional Association: 65.7%
- Trade Association: 26.9%
- Federation: 1.5%
- Philanthropic Organization (charity): 1.1%
- Coalition or Interest Group: 1.0%
- For-profit Company: 0.4%
- Governmental Entity: 0.0%
- Other: 2.6%

75% of the fastest growing associations have at least 15% or more international members.

More than 50% have at least 25% international members.
Our international strategy is...

- Complete and being implemented now: 30.0%
- Complete but not yet implemented: 5.0%
- Being developed now: 45.0%
- Being considered but not yet started: 15.0%
- Not being considered: 10.0%
50% more likely to have a strategy in place...

Fastest growing associations more likely to have a strategy in place
How to develop a global growth strategy for your organization

1. Understand if your association should be international?
   • Is your profession or industry sector globalized?

2. Get your Board support

3. Define how you are going to measure success, over what period?

4. Anticipate the two most common objections:
   • “International” costs us money
   • There is nothing ‘we’ are going to learn from international members, we are already the world leaders in this area...
Emerging Markets –
Much more than just BRICS*

Advanced Emerging Economy Countries**:
Brazil, the Czech Republic, Hungary, Malaysia, Mexico, Poland, South Africa, Taiwan, Turkey

Secondary Emerging Economy Countries**:
Chile, China, Colombia, Egypt, India, Indonesia, Morocco, Pakistan, Peru, Philippines, Russia, Thailand, the UAE.

* Brazil, Russia, India, China and South Africa
** As of late 2011, the “Advanced Emerging Markets” and “Secondary Emerging Markets” as listed by the FTSE a financial markets firm jointly owned by The Financial Times and the London Stock Exchange
Replicate or Adapt?
Should you replicate your domestic business model and approach or do you need to adapt your business model for a given market?

Avoid or Attack Market Voids?
For example, in an area where there is a lack of information and transparency, can your association exploit this by providing the platform to address this need?

Should I Stay or Should I go?
Many markets are simply not ready to be exploited in a sustainable or profitable manner. Associations should consider if the time is right or if it is premature to enter certain markets given the current conditions.
Key Questions for Emerging Markets

Leading with Membership?
Membership is often one of the most difficult and least profitable offerings for associations to deliver. Is it the right product to lead with?

Compete or Collaborate?
Associations quite often opt to partner with a local association or institution when entering a new market but does it make more sense to enter as a more direct competitor?

How can we leverage social media?
Social media gives you unprecedented access to emerging markets in an extremely targeted and cost effective manner.
Internet Users in the World by Geographic Regions - 2011

- Asia: 1016.8
- Europe: 500.7

As of the school year ending May 2012, there are over 20 million students and recent college graduates on LinkedIn. They are LinkedIn's fastest-growing demographic.
## Business Models

<table>
<thead>
<tr>
<th>Model</th>
<th>Description</th>
<th>Pro's</th>
<th>Con's</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Global HQ</strong></td>
<td>Single global HQ with staff in one primary location serving a global membership base.</td>
<td>All staff and resources are concentrating in one location providing ease of management coordination, communication and collaboration.</td>
<td>Lack of feedback &quot;from the field&quot; and appearance that the organization is disconnected from the membership and its local issues.</td>
</tr>
<tr>
<td><strong>Chapters</strong></td>
<td>Chapters are semi-autonomous units of the organization based on geographic territories and minimum member counts.</td>
<td>Pushes accountability and relevance closer to the member, allows for some customization for local needs.</td>
<td>Common disputes between large and small chapters versus &quot;headquarters&quot; include: resource allocation, delegation of authority and brand management.</td>
</tr>
<tr>
<td><strong>Federation</strong></td>
<td>Organization whose members are completely autonomous associations, usually at the National level around a common industry or profession.</td>
<td>Requires minimal financial and human resource contribution. Represents a broad geographical base and therefore usually has some political weight at the international level.</td>
<td>Typically underfunded, overly bureaucratic and more focused on political issues over technical or professional issues. Can be very slow to make or implement decisions as major issues must also be decided at the Board level of the individual members.</td>
</tr>
</tbody>
</table>
## Business Models

<table>
<thead>
<tr>
<th>Model</th>
<th>Description</th>
<th>Pro's</th>
<th>Con's</th>
</tr>
</thead>
<tbody>
<tr>
<td>Affiliation</td>
<td>Similar to a Chapter but based on a signed agreement where the parties retain independent identities.</td>
<td>Allows closer collaboration and appearance of a larger network without necessarily incurring large investment or liability issues.</td>
<td>Lack of complete control over brand management issues. Requires a high level of trust or auditing to ensure parties are staying compliant with the affiliation agreement.</td>
</tr>
<tr>
<td>Franchise</td>
<td>The licensing of a brand and intellectual property to a third party for use in a specific manner and within a defined territory. Governed by a franchise agreement.</td>
<td>Can be a very useful way to tap into entrepreneurial organizations to sell specific products for the association with limited investment and market risk.</td>
<td>Requires careful selection of the franchise partner, a well written franchise agreement including specific description on the ownership and handling of all intellectual property and brand management. Also requires a strong management and audit component to ensure the franchise agreement is honored properly.</td>
</tr>
<tr>
<td>For-Profit</td>
<td>The association establishes a wholly owned for-profit subsidiary for a specific territory (such as a country or a region)</td>
<td>The association maintains 100% control over the entity and therefore reaps the full benefit of its activities. Can be very useful for countries where the establishment of a not-for-profit association is very difficult such as the Russian Federation or mainland China.</td>
<td>Requires significant investment in human resources, infrastructure and management time. Will have an impact on the associations Unrelated Business Income Tax (UBIT) and exposes the association to liabilities in the target jurisdiction (employment law, local tax issues, business registration and reporting requirements).</td>
</tr>
</tbody>
</table>
# Business Models

<table>
<thead>
<tr>
<th>Model</th>
<th>Description</th>
<th>Pro's</th>
<th>Con's</th>
</tr>
</thead>
<tbody>
<tr>
<td>Regional Offices</td>
<td>The association establishes regional service centers to deliver membership and other services for a specific geography, either nationally or regionally (such as for &quot;Europe&quot; or &quot;Asia Pacific&quot;). May be own staff or outsourced.</td>
<td>Establishes the association as an international organization, provides local members with a contact point in a local time zone and usually local language. Provides &quot;on-the-ground&quot; feedback and intelligence to the association to better serve its international membership.</td>
<td>Requires a significant investment and a commitment to manage the remote offices. Difficulties arise from challenge of managing staff at a distance including time and language differences. Other issues include financial risks due to currency differences, local laws and requirement to tailor product and services to local needs.</td>
</tr>
<tr>
<td>Outsourced Services</td>
<td>Delegating the delivery of services internationally to third party providers including PCO's (professional conference organizers), AMC's (association management companies) or specialist consultants.</td>
<td>Services are provided for as per a professional services contract by a local supplier that assumes the majority of the risk and liability. A well placed supplier can provide quality services more effectively and efficiently in a given market or geography.</td>
<td>There can be a lack of control or limited recourse if the services provided are not at a required level. There is a limited number of qualified suppliers of professional services for associations internationally.</td>
</tr>
</tbody>
</table>
How to determine market opportunities

- Market sizing - it is not just about the numbers
- Compete or Collaborate?
- Which products and services should you lead with?
Market Opportunity

Market Supply

Market Demand

Market "B"

“Gross” Opportunity
To Compete or Collaborate?

- How to decide?
- What makes a successful partnership?
- When should you compete directly?
- Can you do both, compete and collaborate?
A Partnering Strategy

<table>
<thead>
<tr>
<th>Partner A Makes NO Effort</th>
<th>Partner A Makes Effort</th>
</tr>
</thead>
<tbody>
<tr>
<td>Partner B Makes NO Effort</td>
<td>FAIL</td>
</tr>
<tr>
<td>Partner B Makes Effort</td>
<td>FAIL</td>
</tr>
<tr>
<td></td>
<td>SUCCESS!</td>
</tr>

LOCAL

Compete & Conflict
Collaboration examples

• Joint publications – published in two languages
• Joint conferences – each partner brings specific strengths to the conference
• Exchange programs for visiting professionals, students
• Co-marketing arrangements
• Cross recognition of credentials / qualifications
• Joint Membership
• Discounts and special offers
• Sharing of content / intellectual property
When should you Compete

• In a fragmented market where there is no strong local society

• Where the local partner lacks critical attributes (weak management, poor reputation, lack of resources etc.)

• Where it is critical that you maintain control over your processes, content, products and services (i.e. it is a quality issue you cannot afford to delegate)

• To take advantage of unique opportunities (the local entity stumbles, members looking for alternatives, etc.)
Can you Compete and Collaborate?

Example:

• Compete on webinars and distance learning

• Collaborate on a joint event

• Support local membership*

* You accept members but do not promote or lead with membership drives in the target country. The stronger the local association, the stronger a partner they can be.
Leading with which products and services?

Key considerations:

• What is your cost to deliver?

• What is your highest margin product or service?

• Fixed versus variable costs (Example: Conference vs Webinar)

• Ability to exit a market if needed?

• Are you looking for members or customers? (or both?)
Leading with which products and services?

How to develop a global growth strategy for your organization

Opportunities that are unique to associations:

• Standards – Industry / professional BOK
• Education – High demand for information
• Training – Professional development
• Certification – Career advancement / recognition
• Accreditation – Academic excellence
• Government Affairs – Global regulatory environment
• Social Networks – Threat / opportunity
How to develop a global growth strategy for your organization

1. Get your Board support

2. Define how you are going to measure success, over what period?

3. Pull together a team of volunteers and staff, include international members and stakeholders

4. Step by step strategy process (objectives, target audience, market research and sizing, business model, plan & budget)

5. Communicate the benefits to your core/domestic membership:
   • “International” generates more money than expected
   • Share innovation insights from other parts of the world
Global Challenges

- Defining appropriate business models
- Accurately estimating the international market's potential
- Language issues
- Identifying qualified partners (associations, vendors, other..)
- Governance structure
- Cultural issues
- Identifying qualified volunteers / leaders
- Communications (time zones, other)
- Legal and registration issues
- Standards and regulatory issues
- Currency and banking issues
- Identifying qualified staff (local or expat)
- Assessing and managing risk
- Technology issues
