

Figure 4.1.3. (b) Subjects
International organization activity, by detailed subject / region category: 2000

This table indicates the number of international organizations (whether intergovernmental or nongovernmental) with activities in the different continents or other regional groupings and allocated to each of the detailed subject categories of the matrix (see Figure 4.1.1.). Totals are given for each region and for each cell of the matrix. Where data is available for more than one cell in a row, sub-totals for the row are also given.

The regions used here are defined in the classification system used for Volume 3 of this Yearbook series. An organization's involvement with a particular region is determined on the basis of either its title or its aims, as described in Volume 1 of this Yearbook. Note that an organization may be counted under more than one region.

The organizations are listed by type, indicated by the letter code at the head of each column. (See the appendix "Types of organization" for more information.) In addition, totals are given at the end of each row for certain groupings of types.

Note that two subject headings have been abbreviated: "Transportation, Telecommunications" is printed as "Transport, Telecom.", and "Informatics, Classification" is printed as "Informatics, Class.".
