

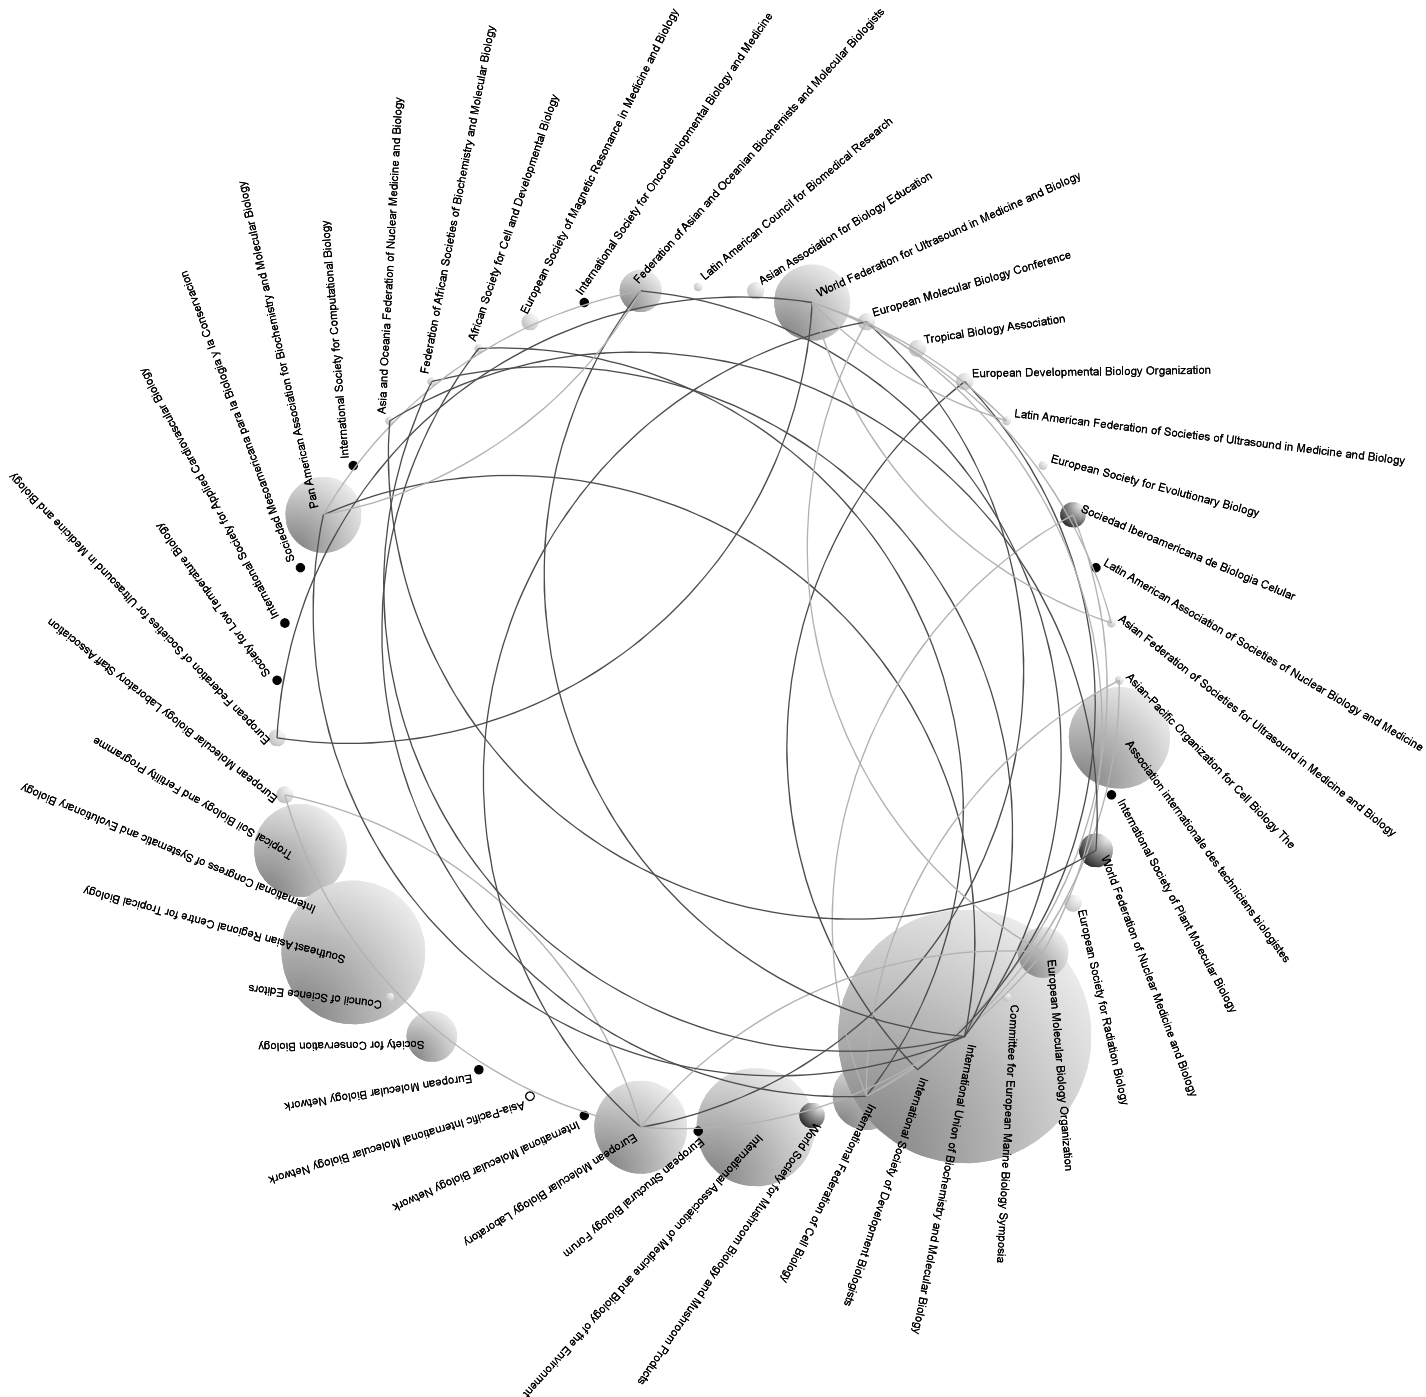

Figure 10.1.11. Relations amongst international organizations concerned with biology (A-F)

Database: International Organizations

Link type: all

Network nodes: 46

UIA database: <http://db.uia.org/scripts/sweb.dll/a?DD=OR&CL=2> ... search for "biology"

This image results from an extraction of 46 international organizations specifically concerned with "biology" (in their title). The selection has been limited to those of types A to F, namely the most international in scope. They have been positioned around a circle and are denoted by smaller circles of varying diameter (according to the number of links of any type that they have to other bodies, not necessarily those in the figure). The lines across the major circle represent the relationships between them -- of any type. Through a biological metaphor, the figure could be viewed as one representation of the ecosystem constituted by such bodies.
