# Figure 10.1.12.
Relations amongst international organizations concerned with mathematics (A-F)

Database: International Organizations
Link type: all
Network nodes: 17
UIA database: http://db.uia.org/scripts/sweb.dll/a?DD=OR&CL=2 ... search for "mathematics"

This image results from an extraction of 17 international organizations specifically concerned with "mathematics" (in their title). These do not therefore include those which specify some particular branch of mathematics or have mathematics as their principal concern under some other title. The selection has been limited to those of types A to F, namely the most international in scope. They have been positioned around a circle and are denoted by smaller circles of varying diameter (according to the number of links of any type that they have to other bodies, not necessarily those in the figure). The lines across the major circle represent the relationships between them -- of any type.
