**Figure 10.3.6.**
Sustainable development

Database: Global Strategies and Solutions
Link type: facilitates strategies
Network nodes: 399
UIA database: http://www.uia.be/indices/alpha/home.php?db=ST

This image is based on 399 strategies from the UIA database on Global Strategies and Solutions -- those containing "sustainable development" in the primary name attributed to them there. The names of the 399 strategies appear around the circumference (and may be viewed on the accompanying CD). The image above shows the "facilitative relationships" between the 399 strategies as they currently appear in the database. It does not include the many other relationships between these strategies (notably broader/narrower links). These links are presented as circles in an effort to provide an integrative image of this pattern of relationships.
