
Appendix 8

Contents of CD-ROM (in back cover pocket)

A CD-ROM is included in a pocket on the inside back cover. It contains the following resources:

An HTML page (index.htm) that summarizes the content and provides access to all parts of the CD-ROM:

1. Images

Basically duplicates of all network visualizations. These are available in folder "figures" and relevant subfolders, which then contain one or more of the following:

- Rasterized grayscale images. These may be viewed using a normal web browser or any image viewer.
- The same network visualizations in colour in Scalable Vector Graphic (SVG) format. These may be viewed in a web browser using a plug-in available on the CD-ROM in folder "tools" or downloadable from <http://www.adobe.com/svg/>
- Decision Explorer model files that can be explored using Decision Explorer Viewer available on the CD-ROM in folder "tools" or downloadable from <http://www.banxia.com/dexplore/viewer.html>
- Selected other resources (VRML, PPT, PDF, etc.)

2. Movies (folder "movies")

A promotional QuickTime movie demonstrating the use of NetMap. QuickTime player is available for installation in folder "tools" or downloadable from <http://www.apple.com/quicktime/>.

A three-minute Ecolynx movie demonstrating the possibilities of the spring map technique in relation to the UIA databases. This movie has been prepared as part of UIA's project funded by the European Commission's Info2000 Programme (1997-2000). It is available in two formats: QuickTime (highest quality) and RealAudio. Free players for both formats are available on the CD-ROM (folder "tools") or downloadable from <http://www.apple.com/quicktime/> and <http://www.real.com/player/> respectively.

3. Viewers, plug-ins in folder "tools"

For use as appropriate (see above).
