

## Figure 6.1.2. Organization: structure and leadership

### Distribution of budgets of international organizations: 2002

This table indicates the number of international organizations with an annual budget figure within a specified range. Only organizations whose descriptions in Volume 1 of this Yearbook series specify an annual budget figure are counted here. At the end of the table is given the total number of organizations included (about 4.5% of all eligible organizations). Note that, as the Yearbook lists no information on finance for organizations of Types S and T, these types and the cluster they compose (Cluster III) are not counted in this table.

For the purposes of comparison all budget figures have been converted into Euros at exchange rates current in October 2003. The user is advised to see these figures as indicative only. It is not the intention of this exercise to give precise information on the annual budget of any one organization but rather to indicate the range of annual budgets among organizations of a given type.

For each range, the first line of totals indicates the number of intergovernmental organizations whose annual budget figure falls within that range; the second line of totals indicates the number of non-governmental organizations; the third line indicates the number of organizations in total.

The organizations are totalled by type, indicated by the letter code at the head of each column. In addition, totals are given at the end of each row by cluster. The organization types allocated to each cluster are as follows:

Cluster I (International organizations): Types A B C D F

Cluster II (Dependent organizations): Types E K R

Cluster III (Organizational substitutes): Types S T – Not included in this table (see above)

Cluster IV (National organizations): Types G N

Cluster V (Dead, inactive and unconfirmed bodies): Types H J U

See the Appendix "Types of organization" for more information.
