

Figure 6.2.3. Organizations: structure and leadership
Leading people in international organizations – country of citizenship: 2002

This figure, reproduced from *Who' Who in International Organizations*, 4th edition, gives the total number of biographees listed under the 145 countries indicated in the index by country of citizenship. Only the 2,646 biographees whose citizenship (or nationality) is known to the editors are included here. Of these 62 are included twice because they have dual citizenship. Breakdowns are given for male and female biographees; however, because gender is not always known to the editors, the number given in the column "Both" may be greater than the sum of the columns "Men" and "Women". Totals may differ slightly from the index due to intervening editorial work.

This figure also gives the total number of organizations (from Volume 1 of the *Yearbook of International Organizations*) listed in the entries of these biographees.

A graphic representation of the continental totals is included in the following figure.

It should be noted that the numbers in this table are derived from information provided by the biographees themselves; according to general policy, the editors took people at their word and made no effort to check the accuracy of the claims.

Note: The geographical names and continental groupings used in this book are chosen for the sake of brevity and common usage. Wherever possible, the country (or territory) name preferred by the biographee concerned is used, providing this is possible within the limits of standardization required for statistical purposes. It is not the intention of the editors to take a position with regard to the political or diplomatic implications of geographical names or continental groupings used.
