

Figure 4.1.4. (a) Subjects
Areas of concern of leading people in international organizations, by subjects: 2005

This figure, reproduced from *Who' Who in International Organizations*, 5th edition, lists detailed region/subject categories derived from the index by area of concern. For each category the total is given of the number of biographees whose involvement in international organizations (i.e. those listed in the paragraph "Organizations (Yearbook)") indicates a concern with that field. The subject categories are listed here by general subject category; in the index they are listed alphabetically. Only those subject categories with biographees listed are included in this table.

All 21,012 biographees are included in the index and are therefore also included in this table. Breakdowns are given for male and female biographees; however, because gender is not always known to the editors, the figure given in the column "Both" may be greater than the sum of the columns "Men" and "Women". This table also gives the total number of organizations (from the *Yearbook of International Organizations*) listed in the entries of these biographees.

The classification system used here is the same as that used for Volume 3 of the *Yearbook of International Organizations* and given in this volume in Figure 4.1.1. A detailed discussion of this classification system can be found in the essay "Functional Classification" at www.uia.org.
