Comments on this edition

The publication of this specialized volume in the *Yearbook of International Organizations* series, included for the first time in 2001, is in response to the many enquiries the editors receive for statistical information on international organizational activity.

The volume is also a response to the needs of many for new ways of thinking about the complexity of international organization networks – and the networks of problems with which they deal, and the networks of strategies advocated in that process.

The editors, the Union of International Associations (UIA), are faced with a major challenge: how to enable people to obtain greater insight into complex networks of relationships amongst international organizations, world problems, strategies in response to them, human development and human values. The challenge is to compensate for the natural tendency to rely on focused information on urgent issues by enabling people to work with contextual information and configurations of related issues and responses to them.

Since the 1970s the UIA has been exploring the visualization of international organization relationships (see Part B in this volume) and the possibility of some form of *Atlas of International Relationships*. Investigation of the latter was supported for a time by the publisher of this Yearbook and by UNESCO in the early 1990s but has only become feasible with recent software and hardware developments.

The main features of this volume are:

Information from Volumes 1-6 of this Yearbook series: As from the 37th edition, all tables previously included as appendices in the other Volumes of this Yearbook now appear in this Volume 5. Volumes 1 to 4

include only tabular statistical summaries of the entries actually printed in those volumes.

Historical data and analyses: In addition to all the statistical tables formerly or currently included in Volumes 1 to 4, this volume contains extensive historical statistical summaries and presentations of statistical data, drawing on past editions of the Yearbook series.

Meetings of international organizations: This volume also includes statistical data from the international meetings database for meetings of international organizations as published in the *International Congress Calendar*.

Preoccupations of international organizations: The statistics in this Volume 5 include data drawn from the profiles of problems and strategies – and the extensive network of relationships among them and between them and international organizations. This data is held in a companion series, the *Encyclopedia of World Problems and Human Potential* (available online at <http://www.uia.org/encyclopedia/home.php>).

Graphics: The statistical data are also shown in standard graphical formats (pie charts, graphs, bar charts, etc.) and are accompanied by commentary on criteria, methodology and interpretation, including possible shortcomings and biases in the data and their analysis.

Visualizations and patterns: Representations of non-quantitative relationships and patterns between organizations, problems and strategies are provided, in some editions, in the form of: network (spring) maps, concept (decision) maps, organization charts, etc. Online variants in colour of many of these may also be accessed from the web URLs referenced on individual presentations.

Notes to the user

To find the description of an organization in the Yearbook:

- **If you know the name or abbreviation of the organization:**

Locate the organization in the alphabetic sequence in Volume 1. All names in all official languages and abbreviations are included in the alphabetic sequence. Note that the alphabetic sequence does not take account of prepositions or articles.

You may find the name in the form of a cross-reference to the sequence number where the description is given. The sequence number follows the alphabetic order.

- **If you know keywords in the name of the organization:**

Consult the index in Volume 3. It will refer you to the sequence number of the description in Volume 1.

- **If you know the field in which the organization is active (eg its aims or activities):**

Consult the classified list of organizations by subject in Volume 3. It will refer you to the the sequence number of the description in Volume 1.

- **If you know where the organization is located, or where it has members:**

Consult the listing of organizations by country in Volume 2. This will refer you to the sequence number of the description in Volume 1.

- **If you know the name of the principal officer of the organization:**

Consult the officer's biographical description in Volume 6. This will refer you to the sequence number of the description in Volume 1.

- **If you know the name of another organization that has a formal relationship with the one you want:**

The description of the other organization in Volume 1 will refer you to the sequence number of the description of the organization you want in Volume 1.

Notes pour l'utilisateur

Pour trouver la notice descriptive d'une organisation:

- **A partir du nom (ou de son abréviation):**

Consultez d'abord la séquence alphabétique du volume 1. Les noms et abréviations y sont repris dans toutes les langues officielles.

Vous constaterez que la séquence alphabétique ne tient pas compte des prépositions et articles.

Le nom que vous recherchez peut vous renvoyer à un numéro de séquence sous lequel est reprise la notice descriptive de l'organisation. La numérotation suit l'ordre alphabétique.

- **A partir d'un mot clé:**

Consultez l'index dans le volume 3 qui renvoie au numéro de séquence de la notice descriptive dans le volume 1.

- **A partir d'un sujet ou d'une matière spécifique:**

Consultez la liste classifiée par sujet dans le volume 3. Cette liste renvoie au numéro de séquence de la notice descriptive du volume 1.

- **A partir d'un pays:**

Consultez la liste par pays de secrétariat et de membrariat dans le volume 2. Cette liste renvoie au numéro de séquence de la notice descriptive du volume 1.

- **Si vous connaissez le nom du responsable principal de l'organisation:**

Consultez la description biographique du responsable dans le Volume 6. Celle-ci vous dirigera vers le numéro de séquence de la description dans le Volume 1.

- **A partir d'une organisation en relations officielles avec celle que vous cherchez:**

La description de la première dans le volume 1 vous donnera le numéro de notice de la deuxième dans ce même volume 1.

Abbreviations used

Organization forms

NGO non-governmental organization
IGO intergovernmental organization

Names of countries

The names of countries given in each entry or in the index may not be the complete official names of those countries as abridged names are used to simplify consultation. In a few cases, such as in the description of an organization's history, it has been considered appropriate to leave the old form of a country's name.

Note

It is not the intention of the editors to take a position with regard to the political or diplomatic implications of geographical names or continental groupings used.

The geographical names used in this publication are chosen for the sake of brevity and common usage. Wherever possible, the country (or territory) name preferred by the organization concerned is used, providing this is possible within the limits of standardization required for mailing or statistical purposes. It is important to note that some organizations insist on the inclusion of territories on the same basis as countries, or on the inclusion of countries or territories that are not recognized by other organizations.

Political changes over the years may lead to some questions in an organization's description. Briefly: countries referred to in an organization's description retain their old form when referring to a date prior to the change – for example, towns referred to in events prior to 1991 still retain their country as German DR (Democratic Republic) or Germany FR (Federal Republic), while subsequent dates refer simply to Germany.

Abréviations utilisées

Formes d'organisation

NGO Organisation non-gouvernementale
IGO Organisation intergouvernementale

Noms de pays

Les noms des pays apparaissant dans chaque notice ou dans l'index ne correspondent pas toujours exactement à l'appellation officielle de ces pays. Des abréviations ont été utilisées pour faciliter la lecture. Dans quelques cas, par exemple dans la partie historique, il a été jugé préférable de conserver l'ancien nom du pays cité.

Note

Il n'entre pas dans les intentions des éditeurs de prendre position au regard des implications politiques ou diplomatiques résultant du choix et de l'utilisation des noms géographiques ou de groupements continentaux.

Le choix des noms géographiques – pays ou territoires – dans cet ouvrage est fait en fonction de leur brièveté et de l'usage commun. Dans la mesure du possible, c'est le nom tel qu'adopté par l'organisation qui est retenu, mais seulement dans les limites d'une normalisation nécessaire pour les services postaux ou les statistiques. Il est important de rappeler que certaines organisations insistent sur l'inclusion de territoires au même titre que les pays ou sur l'inclusion de pays et de territoires qui ne sont pas reconnus comme tels par d'autres organisations.

Les changements politiques au cours des années peuvent poser de questions pour la description des organisations. En résumé: les pays mentionnés dans la description d'une organisation ont gardé leur ancienne appellation dans le cas où l'on se réfère à une date antérieure au changement – par exemple, la section "Events", qui concerne le passé, conserve la vérité historique de la division de l'Allemagne d'avant 1991. Dans les adresses, les pays sont mentionnés sous leur nouveau nom.

Warning

Coverage

The Yearbook attempts to cover all "international organizations", according to a broad range of criteria. It therefore includes many bodies that may be perceived as not being fully international, or as not being organizations as such, or as not being of sufficient significance to merit inclusion. Such bodies are nevertheless included, so as to enable users to make their own evaluation in the light of their own criteria. See the Appendix "Types of organization" for further information.

Sources

The descriptions of organizations in this Yearbook are based on information received from a variety of sources. Priority is normally given to information received from the organizations themselves, and every effort is made by the editors to check this information against other sources (periodicals, official documents, media, etc.). Organizations may over time change their purpose or characteristics. The editors therefore use information from a variety of sources to present the most appropriate static picture of what is essentially a dynamic situation. See the Appendix "Editorial problems" for further information.

Reliability of sources

Because an organization's view of itself has been given priority, and because secondary sources confirming this view are not always available or reliable, the editors cannot take responsibility for any resulting inaccuracies in the information presented. The editors apologize for any inconvenience this might cause the user. See the Appendix "Editorial problems" for further information.

Censorship

Users should be aware that the editors are subject to pressure from some international bodies to suppress certain categories of information. In most cases, the editors resist these pressures; in some cases, the entry is reworded to respect the concern of the body in question. No entries have been eliminated as a result of such pressure. See the Appendix "Editorial problems" for further information.

Evaluation

The final evaluation of the information presented here must be left to the users of this volume. See the Appendices "Contents of organization descriptions", "Types of organization" and "Editorial problems and policies" for further information.

Avertissement

Contenu

L'objectif du *Yearbook of International Organizations* est de couvrir tous les types d'organisations internationales, à partir d'un large éventail de critères. On peut donc y trouver des organismes qui, selon certaines définitions plus étroites, n'y auraient pas place – pas assez "internationaux" par exemple, ou pas une "vrai" organisation, ou d'importance trop réduite. Voir aussi Annexe: "Types of organization".

Sources

La description des organisations telle qu'elle est présentée dans ce Yearbook est basée sur un ensemble de sources différentes. Priorité est normalement donnée à l'information reçue des organisations elles-mêmes, et en même temps tous les efforts sont faits par la rédaction pour contrôler cette information à l'aide d'autres sources (périodiques, documents officiels, médias, etc). Il peut arriver, qu'au cours des années, des organisations modifient leurs objectifs ou changent leurs caractéristiques. Les rédacteurs du *Yearbook* recueillent des informations auprès de multiples sources afin de présenter de façon appropriée, mais inévitablement statique, la physionomie d'une situation essentiellement dynamique. Voir aussi Annexe: "Editorial problems".

Fiabilité des sources

Quoiqu'il en soit, l'évaluation finale de l'information présentée incombe à l'utilisateur qui l'établira à la lumière de ses critères personnels. La rédaction décline toute responsabilité pour les inexactitudes qui se glisseraient dans l'information présentée et s'excuse des inconvénients qui pourraient en découler pour l'utilisateur. Voir aussi Annexe: "Editorial problems".

Censure

Peut-être est-ce le lieu de rappeler ici que, en ce qui concerne certaines catégories d'information, la rédaction du Yearbook est l'objet de pressions de la part d'organisations qui en demandent la suppression. Dans la plupart des cas, la rédaction du Yearbook résiste à de telles pressions. Sinon, mention est faite de la préoccupation de l'organisation concernée. Aucune notice n'a été éliminée du fait d'une quelconque pression. Voir aussi Annexe: "Editorial problems".

Evaluation

L'évaluation finale de l'information présentée dans ce volume est laissée aux utilisateurs. Voir aussi les Annexes "Contenu des notices descriptives", "Types d'organisation" et "Politique rédactionnelle".

Part A. Statistical data and graphics

In addition to all the tables formerly or currently included in Volumes 1 to 4, this section contains extensive historical statistical summaries and presentations of statistical data, drawing on past editions of the Yearbook series.

Also included are statistical data from the international meetings database for meetings of international organizations as published in the *International Congress Calendar*.

This section also includes data drawn from the profiles of problems and strategies – and the extensive network of relationships among them and between them and international organizations. This data is held in a companion series, the *Encyclopedia of World Problems and Human Potential* (available online at <http://www.uia.org/encyclopedia/home.php>).

The statistical data are also shown in standard graphical formats (pie charts, graphs, bar charts, etc.) and are accompanied by commentary on criteria, methodology and interpretation, including possible shortcomings and biases in the data and their analysis.

For further explanatory information, see Appendix 1: Methodological issues.
