

Figure 8.10.
Regions of interest of international organization officers
Edition 46, 2009/2010 (data collected in 2008)

This figure lists 2,052 detailed subject categories derived from the index by area of concern in Volume 6. Of these categories, 803 are categories by subject only; these are listed here. The remaining 1,249 combinations of regions and subject categories derived from the index by area of concern in Volume 6. See 1.2. "Geographical names" for further information on country names and continental groupings.

For each region/subject category the total is given of the number of biographees whose involvement in international organizations (i.e. those listed in the paragraph "Organizations (Yearbook)") indicates a concern with that field. Totals are also given for each level of the matrix (see 5.1.), and the position of each matrix cell is indicated in parentheses.

The subject categories are listed here by general subject category; in the index they are listed alphabetically. Only those subject categories with biographees listed are included in this table.

All 25,394 biographees are included in the index and are therefore also included in this table. Breakdowns are given for male and female biographees; however, because gender is not always known to the editors, the figure given in the column "Total" may be greater than the sum of the columns "Male" and "Female".

This table also gives the total number of organizations (from Volume 1 of this Yearbook) listed in the entries of these biographees.

The classification system used here is the same as that used for Volume 3 of this Yearbook and is presented in 5.1. A detailed discussion of this classification system can be found in the essay 10.4. "Functional Classification".
