

Figure 9.1.1. Current year Geographic distribution of international meetings in 2009

Please see the Introduction for information regarding the criteria for inclusion in this report, and the policy regarding country names and continental divisions.

The data in this report are drawn from the *International Congress Calendar*, the meetings database of the UIA. In this table:

Meetings counted under the heading “A” are “Meetings of international organizations”:

- meetings organized or sponsored by “international organizations”, i.e. non-governmental organizations (NGOs) and intergovernmental organizations (IGOs) that are included in the UIA’s *Yearbook of International Organizations* (see the Introduction “What is an ‘international organization’”) and whose details are subject to systematic collection and updates on an annual basis by the UIA and
- with at least 50 participants, or number of participants unknown.

Meetings counted under the heading “B” are “Other international meetings (3 days)”:

- meetings not organized or sponsored by “international organizations” but nonetheless of significant international character, notably those organized by national organizations and national branches of international organizations and
- at least 40 percent of the participants are from countries other than the host country and at least 5 nationalities are represented and
- lasting at least 3 days, or of unknown duration and
- with either a concurrent exhibition or at least **300** participants

Meetings counted under the heading “C” are “Other international meetings (2 days)”:

- meetings not organized or sponsored by “international organizations” but nonetheless of significant international character, notably those organized by national organizations and national branches of international organizations and
- at least 40 percent of the participants are from countries other than the host country and at least 5 nationalities are represented and
- lasting at least 2 days, or of unknown duration and
- with either a concurrent exhibition or at least 250 participants

Caveat: It should be remembered that the number of meetings for the current reporting year (2009) is expected to be around 80 percent of that extracted from the database five years hence, by which time data stability is expected to be more or less reached for 2009.
