

Figure 9.1.2. Current year Top international meeting countries in 2009

This table is extracted from Figure 9.1.1.

Please see the Introduction or the introductory notes to Figure 9.1.1. for an explanation of the column headings "A" and "A+B" and "A+C".

In this table, only the 60 countries with the most meetings, whether of type A or type A+B together or type A+C together, are included. Details on other countries can be found in Figure 9.1.1. The total meetings of all countries, as listed in Figure 9.1.1., is used to calculate the percentages.

Three lists are given:

- Countries are listed in descending order of the total number of meetings of type A.
- Countries are listed in descending order of the total number of meetings of type A+B.
- Countries are listed in descending order of the total number of meetings of type A+C.

Caveat: It should be remembered that the number of meetings for the current reporting year (2009) is expected to be around 80 percent of that extracted from the database five years hence, by which time data stability is expected to be more or less reached for 2009.
