

Figure 9.3.8. Ten year review
Growth rates by city in 1995-2004

This table compares the number of meetings of type A in 1995 and in 2004 and indicates the rate of increase or decrease between those two years. Note that these two years have, in themselves, no significance except as the first and the last years of a 10-year period. A different 10-year period would likely give different results.

Only those cities are listed with a total of at least 50 meetings of type A during the period 1995 to 2004 and with an increase or decrease of at least 45% in the number of meetings in 2004 compared to 1995. Cities are listed in descending order of the rate of change.

Please see Figure 9.3.6. for an explanation of the types of meetings included under type A.

Caveat: When comparing consecutive years in flux, it should be remembered that both years' totals can be expected to change over time, the latest slightly more rapidly than the older. For the years presented here, the data can be assumed to be now reasonably stable.

City	% of change 1995-2004	Number of meetings of Type A									
		1995	1996	1997	1998	1999	2000	2001	2002	2003	2004
