

Section 9: Table 1.2. Current year Top international meeting countries in 2010

This table is extracted from Table 1.1.

Please see the Introduction or the introductory notes to Table 1.1. for an explanation of the column headings "A" and "A+B" and "A+C".

In this table, only the countries with at least 20 meetings, whether of type A or type A+B together or type A+C together, are included. Details on other countries can be found in Table 1.1. The total meetings of all countries, as listed in Table 1.1., is used to calculate the percentages.

Three lists are given:

- Countries are listed in descending order of the total number of meetings of type A., with at least 20 such meetings
- Countries are listed in descending order of the total number of meetings of type A+B, with at least 20 such meetings
- Countries are listed in descending order of the total number of meetings of type A+C, with at least 20 such meetings

Caveat: It should be remembered that the number of meetings for the current reporting year (2010) is expected to be around 80 percent of that extracted from the database five years hence, by which time data stability is expected to be more or less reached for 2010.
