

Section 9: Table 1.3. Current year Top international meeting cities in 2010

This table is extracted from Table 1.1.

Please see the Introduction or the introductory notes to Table 1.1. for an explanation of the column headings "A" and "A+B" and "A+C".

In this table, only the cities with at least 35 meetings, whether of type A or type A+B together or type A+C together, are included. Details on other cities can be found in Table 1.1. The total meetings of all cities, as listed in Table 1.1., is used to calculate the percentages.

Three lists are given:

- Cities are listed in descending order of the total number of meetings of type A, with at least 35 such meetings
- Cities are listed in descending order of the total number of meetings of type A+B, with at least 35 such meetings
- Cities are listed in descending order of the total number of meetings of type A+C, with at least 35 such meetings

Caveat: It should be remembered that the number of meetings for the current reporting year (2010) is expected to be around 80 percent of that extracted from the database five years hence, by which time data stability is expected to be more or less reached for 2010.

City	A: total meetings	A: as % of world	City	A+B: total meetings	A+B: as % of world	City	A+B: total meetings	A+B: as % of world
