

Section 9: Table 2.2.(a) Five year review
Top international meeting cities in 2006-2010: Type A

This table lists the cities with at least 100 meetings of type A during the period 2006 to 2010, giving the total number of meetings of type A in each city per year from 2006 to 2010. Cities are listed in alphabetical order.

Meetings counted under the heading “A” are “Meetings of international organizations”:

- meetings organized or sponsored by “international organizations”, i.e. non-governmental organizations (NGOs) and intergovernmental organizations (IGOs) that are included in the UIA’s *Yearbook of International Organizations* (see the Introduction “What is an ‘international organization’”) and whose details are subject to systematic collection and updates on an annual basis by the UIA and
- with at least 50 participants, or number of participants unknown.

The total meetings of all cities for each year of type A is used to calculate the percentages.

Caveat: When comparing consecutive years in flux, it should be remembered that both years’ totals can be expected to change over time, the latest slightly more rapidly than the older. The number of meetings for the current reporting year (2010) is expected to be around 80 percent of that extracted from the database five years, by which time data stability is expected to be more or less reached for 2010.

| City | 2006 “A” | | 2007 “A” | | 2008 “A” | | 2009 “A” | | 2010 “A” | |

Section 9: Table 2.2.(b) Five year review
Top international meeting cities in 2006-2010: Type A+B

This table lists the cities with at least 100 meetings of type A+B during the period 2006 to 2010, giving the total number of meetings of type A+B in each city per year from 2006 to 2010. Cities are listed in alphabetical order.

Meetings counted under the heading “A” are “Meetings of international organizations”: see Introduction to Table 2.2.(a)

Meetings counted under the heading “B” are “Other international meetings (3 days)”:

- meetings not organized or sponsored by “international organizations” but nonetheless of significant international character, notably those organized by national organizations and national branches of international organizations and
- at least 40 percent of the participants are from countries other than the host country and at least 5 nationalities are represented and
- lasting at least 3 days, or of unknown duration and
- with either a concurrent exhibition or at least 300 participants

The total meetings of all cities for each year of type A+B is used to calculate the percentages.

Caveat: When comparing consecutive years in flux, it should be remembered that both years' totals can be expected to change over time, the latest slightly more rapidly than the older. The number of meetings for the current reporting year (2010) is expected to be around 80 percent of that extracted from the database five years, by which time data stability is expected to be more or less reached for 2010.

| City | 2006 “A+B” | | 2007 “A+B” | | 2008 “A+B” | | 2009 “A+B” | | 2010 “A+B” | |

Section 9: Table 2.2.(c) Five year review
Top international meeting cities in 2006-2010: Type A+C

This table lists the cities with at least 100 meetings of type A+C during the period 2006 to 2010, giving the total number of meetings of type A+C in each city per year from 2006 to 2010. Cities are listed in alphabetical order.

Meetings counted under the heading “A” are “Meetings of international organizations”: see Introduction to Table 2.2.(a)

Meetings counted under the heading “C” are “Other international meetings (2 days)”:

- meetings not organized or sponsored by “international organizations” but nonetheless of significant international character, notably those organized by national organizations and national branches of international organizations and
- at least 40 percent of the participants are from countries other than the host country and at least 5 nationalities are represented and
- lasting at least 2 days, or of unknown duration and
- with either a concurrent exhibition or at least 250 participants

The total meetings of all cities for each year of type A+C is used to calculate the percentages.

Caveat: When comparing consecutive years in flux, it should be remembered that both years' totals can be expected to change over time, the latest slightly more rapidly than the older. The number of meetings for the current reporting year (2010) is expected to be around 80 percent of that extracted from the database five years, by which time data stability is expected to be more or less reached for 2010.

| City | 2006 “A+C” | | 2007 “A+C” | | 2008 “A+C” | | 2009 “A+C” | | 2010 “A+C” | |
