## Section 9: Table 4.3. Long-term review

## Top 10 international meeting countries and cities in 1857-2006

This table lists the 10 countries and the 9 or 10 cities with the greatest number of meetings of type A for each 25-year period from 1857-2006.

Meetings counted under the heading "A" are "Meetings of international organizations" and meet all the following criteria:

- meetings organized or sponsored by "international organizations", i.e. international non-governmental organizations (INGOs) and intergovernmental organizations (IGOs) that are included in the UIA's Yearbook of International Organizations (see the Introduction "What is an 'international organization"") and whose details are subject to systematic collection and updates on an annual basis by
- with at least 50 participants, or number of participants unknown.

(\*) Note: For this table the editors have chosen to group defunct countries under their current names in cases where exactly the same territory is covered. In practical terms for this edition, this affects only Germany: "Germany" covers pre-1945 Germany, the German Democratic Republic and the German Federal Republic of 1945-1989, and post-1989 Germany. Likewise, cities, while being listed under the country in which they are currently located, have been grouped and totalled by city, regardless of any changes in country name. Equally, cities with names known by various spellings have been grouped and totalled. For example, Prague is listed as "Prague, Czech Rep", regardless of the year. Cities so treated are indicated by a "(\*)" after the name.

Caveat: When comparing consecutive years in flux, it should be remembered that both years' totals can be expected to change over time, the latest slightly more rapidly than the older. For the years presented here, the data can be assumed to be now reasonably stable.

Data for the years prior to 1983 require special mention. The UIA meetings database - the source of this statistics report and of the International Congress Calendar - contains, with few exceptions, only information since 1983, the year in which the UIA installed its own computerized data storage system. Most data in this report for the years prior to 1983 were collected not by the rigorous collection methods under which the International Congress Calendar operates, but by the more flexible (insofar as recording meeting activity is concerned) standards of the Yearbook of International Organizations. The Yearbook presents a general picture of an organization and its activities (including its events) while the Calendar focuses exclusively on documenting events. It should therefore not be assumed that the data for the years prior to 1983, in most cases extracted from the Yearbook and not from the Calendar, give a complete history of the meetings of all organizations and associations. The volume of data available for analysis in this section is, however, sufficient to make it indicative.
