

Section 5: Table 9.5.4. Long-term review

International association meetings: 1846-2015

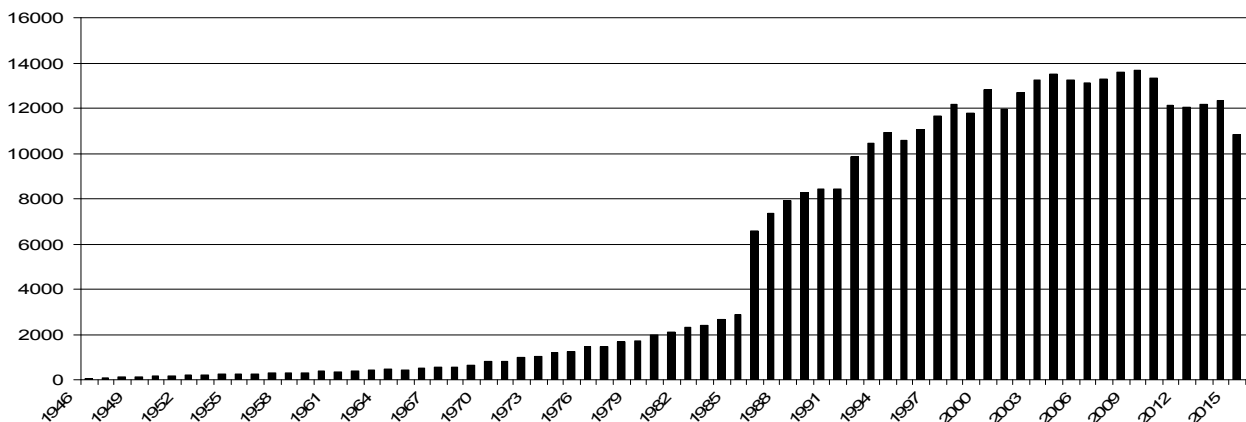

These charts show the number of international association meetings of type A over time. Note that each chart has a different scale on the Y axis (number of meetings).

The notes and caveats of Table 9.5.3. also apply here.

From 1846 to 1945

From 1946 to 2015

From 2001-2015

Caveat: It should be remembered that the number of meetings in the database for the current reporting year will, on average, increase by about 11% over the next year, and by about 35% over the following five years.
