

**Figure 8.10.**

## **Regions of interest of international organization officers**

*Edition 55: taken from Edition 54, 2017/2018 (data collected in 2016-2017)*

Tables 8.9 and 8.10 list 1,740 detailed subject categories derived from the index by area of concern: 788 are categories by subject only; 952 are combinations of regions and subject categories. For each category the total is given of the number of biographees whose involvement in international organizations (i.e. those listed in the paragraph "Organizations (Yearbook)") indicates a concern with that field. Totals are also given for each level of the matrix (see preceding page), and the position of each matrix cell is indicated in parentheses.

This table lists 952 combinations of regions and major subject categories. For each region/category combination, the total is given of the number of biographees whose involvement in international organizations (i.e. those listed in the paragraph "Organizations (Yearbook)") indicates a concern with that combination.

The region/category combinations are listed here by general subject category within the region. Only those subject categories with biographees listed are included in this table.

All 7,343 biographees are included in the index and are therefore also included in this table. Breakdowns are given for male and female biographees; however, because gender is not always known to the editors, the figure given in the column "Total" may be greater than the sum of the columns "Men" and "Women".

This table also gives the total number of organizations (from Volume 1 of this Yearbook) listed in the entries of these biographees.

The classification system used here is the same as that used for Volume 3 of this Yearbook. A detailed discussion of this classification system can be found in the essay "Functional Classification" at [www.uia.org](http://www.uia.org). Other presentations of this data, and comparisons to earlier data, can be found in section 5 of this Volume.
