
Section 1: Table 9.1.1. Current year International association meetings by country and city in 2017

Please see the Introduction for information regarding the criteria for inclusion in this report, and the policy regarding geographical names.

Countries are listed alphabetically. Cities are listed alphabetically within country.

The data in this report are drawn from the *International Congress Calendar*, the meetings database of the Union of International Associations (UIA), and from the *Yearbook of International Organizations*, the associations database of the UIA.

In this table:

Meetings counted under the heading “A” are “Meetings of international organizations” and meet all the following criteria:

- meetings organized or sponsored by “international organizations”, i.e. international non-governmental organizations (INGOs) and intergovernmental organizations (IGOs) that are included in the UIA’s *Yearbook of International Organizations* (see the Introduction “What is an ‘international organization’”) and whose details are subject to systematic collection and updates on an annual basis by the UIA
- with at least 50 participants, or number of participants unknown

Meetings counted under the heading “B” are “Other international meetings (3 days)” and meet all the following criteria:

- meetings not organized or sponsored by “international organizations” but nonetheless of significant international character, notably those organized by national organizations and national branches of international organizations
- at least 40 percent of the participants are from countries other than the host country and at least 5 nationalities are represented
- lasting at least 3 days, or of unknown duration
- with either a concurrent exhibition or at least 300 participants

Meetings counted under the heading “C” are “Other international meetings (2 days)” and meet all the following criteria:

- meetings not organized or sponsored by “international organizations” but nonetheless of significant international character, notably those organized by national organizations and national branches of international organizations
- at least 40 percent of the participants are from countries other than the host country and at least 5 nationalities are represented
- lasting at least 2 days, or of unknown duration
- with either a concurrent exhibition or at least 250 participants

Note: The editors are aware there may be inconsistencies in spelling or usage of city names, and would welcome being given the information necessary to correct these. Some apparent inconsistencies, however, may be due to the preferences of the organizer (for example, indicating a meeting is held in a suburb or distinct district of a major city rather than in the city itself).

Caveat: It should be remembered that the number of meetings in the database for the current reporting year will, on average, increase by about 11% over the next year, and by about 34% over the following five years.
