

Section 2: Table 9.2.3.(a) Current year Ratio of population to meetings in 2017: Type A

This table uses the data on international association meetings of type A presented in Table 9.1.1. and also data on population numbers of the countries listed.

Countries are listed in alphabetical order. For ranking, see Table 9.2.3.(b). Only countries with at least 1 international association meeting in 2017, as detailed in Table 9.1.1., are included here.

The first column gives the total number of meetings of type A held in 2017 in the country specified. The second column gives the current population of that country. The third column gives the ratio of meetings to population, where meetings has the value of "1".

For example: for 976,666.7 people in Albania there was 1 international association meeting in 2017 in Albania; for 158,000.0 people in Curaçao there was 1 international association meeting in 2017 in Curaçao.

Meetings counted under the heading "A" are "Meetings of international organizations" and meet all the following criteria:

- meetings organized or sponsored by "international organizations", i.e. international non-governmental organizations (INGOs) and intergovernmental organizations (IGOs) that are included in the UIA's *Yearbook of International Organizations* (see the Introduction "What is an 'international organization'") and whose details are subject to systematic collection and updates on an annual basis by the UIA
- with at least 50 participants, or number of participants unknown

Caveat: It should be remembered that the number of meetings in the database for the current reporting year will, on average, increase by about 11% over the next year, and by about 34% over the following five years.

Section 2: Table 9.2.3.(b) Current year

Top countries by ratio of population to meetings in 2017: Type A

The introduction to Table 9.2.3.(a) applies equally to this table.

For an alphabetical listing see Table 9.2.3.(a).

For example: for 4,263 people in Monaco there was 1 international association meeting in 2017 in Monaco; for 220,141.7 people in Thailand there was 1 international association meeting in 2017 in Thailand.

Caveat: It should be remembered that the number of meetings in the database for the current reporting year will, on average, increase by about 11% over the next year, and by about 34% over the following five years.
