

## Section 4: Table 9.4.3. Fifteen year review: supplementary information

### Participant numbers in international association meetings by month 2003-2017: Type A

This table lists the number of meetings of type A by month and by number of participants for each of the years from 2003 to 2017.

**Meetings counted under the heading “A” are “Meetings of international organizations” and meet all the following criteria:**

- meetings organized or sponsored by “international organizations”, i.e. international non-governmental organizations (INGOs) and intergovernmental organizations (IGOs) that are included in the UIA’s *Yearbook of International Organizations* (see the Introduction “What is an ‘international organization’”) and whose details are subject to systematic collection and updates on an annual basis by the UIA
- with at least 50 participants, or number of participants unknown

Meetings for which the number of participants is unknown, while qualifying as “type A”, are not included in this table. Meetings for which the month is unknown are not included here.

The number in the last column is the average percentage of international association meetings held in that month with that number of participants over the 15 year period. Thus: 1.3% of association meetings held in the past 15 years was held in January and had fewer than 101 participants; 0.1% of association meetings held in the past 15 years was held in February and had more than 7,000 participants.

**Caveat: It should be remembered that the number of meetings in the database for the current reporting year will, on average, increase by about 11% over the next year, and by about 34% over the following five years.**
