Methodology used for the Yearbook project “Global Civil Society and the United Nations Sustainable Development Goals”

Each of the 100 cells in the subject matrix (see Figure 5.1) can be divided into multiple sub-cells, with at present 840 sub-cells in total.

For this project, the first exercise was to review all 840 sub-cells and determine which of the 17 United Nations Sustainable Development Goals (SDGs) were relevant to each sub-cell domain. In this first review, each sub-cell could have been assigned to up to four SDGs. The result was the assignation of 323 sub-cells to one or more SDGs. These 323 sub-cells are listed below together with the SDGs to which they were, in this first review, assigned.
