
9.1.3 Caveat

The UIA editors work continuously throughout the year on the meetings database, adding and modifying event records using information acquired from international organizations and secondary sources, whether for meetings planned for future years or for meetings which took place in years (long) past. The data in this report are extracted every year anew. The most current edition of the report is therefore the most up to date and comprehensive set of data available. Readers are reminded that data, especially for recent years, are therefore provisional: data will change as research continues and the database is updated.

The number of meetings in the database for the year just past will, on average, increase:

- by about 11% over the next year
- by about 34% over the following five years, and
- by about 37% over the following seven years.
